## VM14B2 V3

14" FHD High Brightness Color TFT-LCD Module

|  | FEATURES |
| :--- | :--- |
|  | $-1920 \times 1080$ resolution |
|  | -1000 nits high brightness |
|  | - Normally black |
|  | $-178 / 178$ view angle |
|  | -25 ms response time |
|  | - eDP interface |
|  | $--10 \sim 50 \mathrm{C}$ Wide operation temperature |
|  | -4.7 mm flat type module design |
|  | -50 K Hrs long backlight life design |
|  | - RoHS Compliance |

Display Specifications

| Items | Unit | Specification |
| :---: | :---: | :---: |
| Screen Diagonal | inch | 14 |
| Active Area | mm | 309.312 (H) x 173.988 (V) |
| Pixels H x V | pixels | $1920 \times 3$ (RGB) $\times 1080$ |
| Pixels Pitch | um | 161.1 (per one triad) $\times 161.1$ |
| Pixel Arrangement |  | RGB Vertical stripe |
| Display mode |  | Normally black |
| White luminance (center) | $\mathrm{Cd} / \mathrm{m}^{2}$ | 1000 (Typ.) |
| Contrast ratio |  | 700 (Typ.) |
| Optical Response Time | msec | 25 ms (Typ. on/off) |
| Normal Input Voltage Vcc | Volt | 3.3 |
| Power Consumption (Vcc Line + LED backlight) | Watt | 8.795 <br> (Vcc line=0.776 ; LED line=8.019 W) |
| Weight | Grams | TBD (max.) |
| Physical size | mm | $\begin{aligned} & 320.8(\mathrm{H}) \times 187.5(\mathrm{~V})(205.49 \mathrm{w} \text { PCBA \& } \\ & \text { Bracket) } \times 4.7 \text { (D) (typ.) } \end{aligned}$ |
| Electrical Interface |  | eDP |
| Support Colors |  | 262k colors (6-bit) |
| Surface Treatment |  | Anti-glare, 3H |
| Temperature range <br> Operating <br> Storage | $\begin{aligned} & { }^{\circ} \mathrm{C} \\ & { }^{\circ} \mathrm{C} \end{aligned}$ | $\begin{aligned} & -10 \sim 50 \\ & -20 \sim 60 \end{aligned}$ |
| RoHS Compliance |  | RoHS Compliance |

Note: This specification is subject to change without notice.

- Accessories for option:
>> Industrial grade Signal control board \& SoC

| Input | Output | Resolution |
| :--- | :--- | :--- |
| RGB with voltage integration | RGB | TBD |
|  <br> backlight driver integration | RGB | WXGA (max) |
|  <br> backlight driver integration | LVDS | WXGA (max) |
| VGA/DVI/DP...etc. | RGB/ LVDS / mipi / <br> eDP / V-by-One | 4K (max.) |
| ARM Cortex A17/A53 <br> (Android 6, 8, \& 11) | LVDS / eDP / V-by- <br> One | 4K (max.) |

>> Industrial grade LED driver board:

| Input | Max Output | Dimming control |
| :--- | :--- | :--- |
| 12 V DC | $36 \mathrm{~V} * 1$ port | PWM |
| $12 \sim 24 \mathrm{~V}$ DC | $53 \mathrm{~V} * 1$ port | PWM / Analog |
| $12 \sim 24 \mathrm{~V}$ DC | $53 \mathrm{~V} * 2$ port | PWM / Analog |
| 24 V | $120 \mathrm{~V} / 150 \mathrm{~V}$ * $1 / 2$ port | PWM |

\gg Industrial grade interactive interface:

| Type | Input | Output | Protection glass <br> thickness |
| :--- | :--- | :--- | :--- |
| Projected capacitive <br> touch panel | Fingers / stylus | USB / i2C | Max 6mm |
| 4wire / 5 wire resistance <br> touch panel | Fingers / stylus | USB / <br> RS232 | TBD |
| Option: <br> 1. Customized cover glass design, special color printing <br> 2. AG/AR/AF Surface treatment, <br> 3. Lamination process, <br> 4. Gloved touch function design, <br> 5. Waterproof touch function design |  |  |  |

```
6. EMI shielding touch design
```

- HANDLING PRECAUTIONS

1) Since front polarizer is easily damaged, pay attention not to scratch it.
2) Be sure to turn off power supply when inserting or disconnecting from input connector.
3) Wipe off water drop immediately. Long contact with water may cause discoloration or spots.
4) When the panel surface is soiled, wipe it with absorbent cotton or other soft cloth.
5) Since the panel is made of glass, it may break or crack if dropped or bumped on hard surface.
6) Since CMOS LSI is used in this module, take care of static electricity and insure human earth when handling.
7) Do not open or modify the Module Assembly.
8) Do not press the reflector sheet at the back of the module to any directions.
9) In case if a Module has to be put back into the packing container slot after once it was taken out from the container, do not press the center of TFTLCD panel.
10) At the insertion or removal of the Signal Interface Connector, be sure not to rotate nor tilt the Interface Connector of the TFT Module
11) After installation of the TFT Module into an enclosure, do not twist nor bend the TFT Module even momentary. At designing the enclosure, it should be taken into consideration that no bending/twisting forces are applied to the TFT Module from outside. Otherwise the TFT Module may be damaged.
